¹ OpEx savings are referring to 2014 combined financials excluding restructuring costs ² CapEx synergies net of restructuring activities and exclude investment in spectrum

Shifting the focus to transformation in 2016

2016 outlook confirmed with Q1 preliminary results

	Baseline 2014* (EUR m)	Outlook 2015** (y-o-y pct. growth)	Actual 2015** (EUR m / y-o-y pct. growth)	Outlook 2016** (y-o-y pct. growth)
MSR	5,528	Broadly stable	5,532 / +0.1% 🗸	Slightly negative to broadly stable
OIBDA	1,461	+15-20%	1,760 / +20.5%	Low to mid single-digit % growth
CapEx	1,161	Low double-digit pct. decline	1,032 / -11.1% 🗸	% growth in the low tens

- 2016 MSR expected to be slightly negative to broadly stable as result of customer acquisition trends and base mix effect
- 2016 OIBDA growth driven primarily by synergies; transformation projects require upfront cost-phasing
- Majority of 2016 synergies stem from 2015 roll-over effects; additional in-year savings from leaver programme and site restructuring
- Capex growth as a result of investment in LTE roll-out & IT consolidation; no further Capex synergies in 2016

>50% of total target of EUR 800m to be achieved in 2016 (~EUR 430m²)

^{**} Expected regulatory effects (e.g. MTR cuts) are included in the outlook. Restructuring costs from the integration of E-Plus Group are excluded from OIBDA and CapEx excludes investments in spectrum.

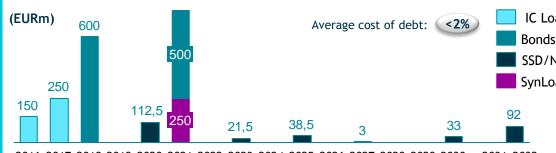

^{*} Baseline figures for 2014 are approximate and the result of the aggregation and then consolidation of Telefónica Deutschland and E-Plus Group financials according to Telefónica Deutschland Group accounting policies. Figures are further adjusted by exceptional effects, such as capital gains or restructuring costs based on estimates made by Telefónica management and resulting in combined figures we believe are more meaningful as a comparable basis.
